CS2080G

Unmanaged Ethernet Switch - 8GE

Brief Views

The CS2080G series unmanaged switches are Fast Ethernet switch designed for high forwarding network environment such as school, family, SMEs and mini monitoring. It has 8 *10/100/1000Mbps adaptive Ethernet ports. All ports support wire-speed forwarding and the data rate is up to 1000Mbps. Auto MDI/MDIX is also available. No configuration is required,plug and play;It will instantly operate as soon as you power it up.

Functional Feature

- 8 *10/100/1000M adaptive RJ45 ports

- All ports have wire-speed forwarding capabilities

- Support MAC address self-learning

- Supports desktop and wall-mounted installation methods

- Plug and play, no management required

- Comply to   IEEE802.3, IEEE802.3u, IEEE802.3ab, IEEE802.3x

Product Specification

Mechanics	
Installation	Desktop,Wall
Dimensions	165mm(L)*92mm(W)*26mm(H)
Weight	0.36kg

Hardware	
Port	8*10/100/1000M BASE-T RJ45
Switching capability	16Gbps
Switching method	Storage forwarding
LED light	Each port has 1 Link/Ack indicator Each device has 1 Power indicator
MAC table size	4K

Power supply	
Power type	external power supply
Working Voltage	DC 12V
Power Consumption	≤4W

Environment	
Working temperature	0 - to 40℃
Storage temperature	-40 - 70℃
Ambient humidity	10% ~90%RH
Storage humidity	5% ~90%RH
Level of protection	Port::6 KV Power:4 KV
